Sprint 1 Review Meeting notes

- 'Pretty good'
- No questions about the website
- Just some technical questions
- Likes the idea about students not needing to register
- Likes the idea about students being enrolled in different modules
- Very happy with the interface and the two user stories we have done

Added new user stories to sprint 2 and decided on order. Todo: assign user stories

Module convenor can enter questions and specify answers for the students to select.
Minimum and maximum number of students preferred in a group.
We can add weighting to the questions depending on our future algorithm.
